Payroll Worries This Week?

With the economy in full recession, more and more small businesses are struggling to accommodate (and keep) their customers by offering attractive 30-45 day payment terms while still generating adequate cash flow for their own daily operations. If your payroll is constantly under pressure or supplier payments running behind, we can help.

Financing your accounts receivable as they are generated (factoring) can provide solutions to:

- **Payroll shortfalls**
- **Late 941 tax payments**
- **Contract concerns (Can you afford to take on new business?)**
- **Supplier discounts (Can early payment reduce your costs?)**

Factoring is the financing mechanism of choice for many small businesses in today's challenging economy. Is it right for your company? We think so! But you can find out more by visiting our website and requesting our FREE Booklet...
